

VISLON® NATULON® with Revived Top Stop

1. New top stop (code: TS-POM2) offers an easier solution for removing and reattaching sliders. This option simplifies slider repair and replacement, contributes to garment longevity, leading to better sustainability. With the innovative track design, this top stop facilitates the slider repair process without necessitating the replacement of the entire zipper in case of slider/puller damage. Ideal for garment repair needs such as in high-end outdoor lines.

CARE INFORMATION

1. The VISLON® zipper with revived top stop is not available for children’s clothing.
2. To prevent accidental ingestion, keep slider and puller used in this product out of the reach of children.

Simply remove the slider by following the track design.
